Re: Hazardous Materials Corridor Study: City of Arcata – Arcata Rail-with-Trail Project

Dear Ms. Diemer:

This Hazardous Materials Corridor Study (Corridor Study) was conducted for the City of Arcata (City) Rail-with-Trail Project (Project), as identified in the Winzler & Kelly October 2, 2009, Agreement for Planning and Design of Arcata Rail-with-Trail Connectivity Project services. The purpose of this Corridor Study was to identify areas of potentially impacted soil and/or groundwater along the proposed Project alignment that may require special handling and disposal during construction, or could pose a health exposure risk to construction workers. The Project vicinity and alignment is shown on Figures 1 and 2. Sites with known and/or potential soil and/or groundwater impact which may affect the proposed alignment and construction are detailed in Tables 1 and 2 and shown on Figures 3-01 through 3-28.

The project study area is linear, spanning approximately 3.8 miles between Larson Park in the north (near the City of Arcata Skate Park on Sunset Avenue) and Bracut Industrial Park in the south. The project alignment runs through the City of Arcata generally paralleling the North Coast Railroad Authority (NCRA) railroad corridor near Foster Avenue/Jolly Giant Creek, Alliance Road, and L Street within the City of Arcata. South of Samoa Boulevard, the trail alignment continues adjacent to the railroad to the Arcata Marsh. Within Arcata Marsh, the proposed trail alignment is located predominantly on existing Marsh trails. Once crossing Butcher Slough at the Arcata Wastewater Treatment Plant, the trail alignment leaves the Marsh and continues parallel to the railroad tracks adjacent to South G Street. The trail continues south beyond the Arcata City limits parallel to the railroad tracks between Highway 101 and Arcata Bay, crossing Gannon Slough, Jacoby Creek, Old Jacoby Creek, and Rocky Gulch. The proposed trail currently terminates at the Highway 101 entrance to the Bracut Industrial Park.

Potential impacts to construction are described in Section 2.0. There are seven locations with documented soil and/or groundwater contamination plus eight former teepee burner locations adjacent to the alignment which have potential to impact the Project alignment and/or construction. Most of the City's base alignment follows the existing railroad grade from the central Arcata Bay near Bracut Lumber Company through northern Arcata, north of the skate park at Sunset Avenue. Railroad right-of-ways in other areas of California have typically been found to contain heavy metals, petroleum hydrocarbons, creosote, chlorinated compounds, pesticides, and polychlorinated biphenyls (PCBs) in soil and/or groundwater. Teepee burners were historically used by lumber companies to reduce the

volume of wood waste generated by lumber milling activities. Dioxins and furans are toxic byproducts of burning wood in conjunction with chlorinated compounds (wood treatment chemicals). Dioxins and furans are known to be persistent in soil and generally concentrated in close proximity to where they were generated. Therefore, the potential exists for these contaminants to be present along the alignment segments adjacent to the railroad right-of-way and in the immediate vicinity of the teepee burners.

Conclusions from the Corridor Study are presented in Section 7.0. Recommendations for additional work are made in section 8.0, on page 11.

1.0 INTRODUCTION

The proposed Arcata Rail-with-Trail Connectivity Project involves construction and operation of an approximately 3.8 mile long Class I, Americans with Disabilities Act (ADA) accessible, non-motorized multiuse trail. According to the American Association of State Highway Transportation Officials, a Class I Trail is a paved or unpaved non-motorized facility physically separated from motorized vehicular traffic by an open space or barrier.

The proposed project corridor would run from northern Arcata at Larson Park (near Sunset Avenue and the Arcata Skate Park), through the City of Arcata and the Arcata Marsh, and along the eastern edge of Arcata Bay south to the Highway 101 and Bracut intersection. The existing corridor includes three transportation arteries: the North Coast Railroad Authority's railroad right-of-way, a portion of the Highway 101 corridor and also segments of City-owned road right-of-way.

The City of Arcata currently has 20 miles of off-road trails and 16 miles of bike lanes. Although the City's active non-motorized transportation system is institutionally established, there are several large gaps that make the City difficult to navigate for pedestrians and bicycles. In 2004, the City drafted the Arcata Pedestrian and Bicycle Master Plan, in which over 35 miles of projects were developed to meet the increasing local demand for non-motorized alternatives and connectivity to and from the Pacific Coast and Humboldt Bay.

The railroad right-of-way owned by the NCRA, which travels through the center of the City of Arcata on a north/south axis, was identified in the 2004 Master Plan as a corridor of significant potential for a non-motorized trail. This portion of the NCRA corridor passes through several City parks, across commercial areas within the City, across primary City streets and a state highway (SR255), through the City of Arcata Marsh and Wildlife Sanctuary, adjacent to the public works yard and wastewater treatment facility yard, and along the Eureka-Arcata Highway 101 Safety Corridor and Caltrans right-of-way.

The Bay Trail Feasibility Study (HCAOG, 2007) further studied the feasibility of a trail between Arcata and Eureka and presented alternative alignments and sections for trail construction. The 2007 Study covered a large portion of the current project including the section from South I Street in Arcata to the Bracut Intersection along Highway 101 on the Eureka-Arcata Corridor.

In 2009, the City received grant funding from the California Coastal Conservancy (CCC) to complete planning, engineering design, and permitting for a “Rail-with-Trail” facility (the proposed project). “Rail-with-Trail” is an arrangement in which an established shared-use trail runs parallel to a rail line that is either functional or has the capacity to become functional in the future. In such projects, the trail is designed and developed to operate in the railroad right-of-way in such a way as to avoid interference with the functionality of the adjacent rail line.

In 1975, the Northwestern Pacific Railroad Company ran 65,000 cars a year or almost 200 cars per day through the study area. However, rail usage dropped dramatically in the following decade as the Humboldt County timber industry declined. In 1989, the NCRA was formed by the California Legislature under the North Coast Railroad Authority Act to ensure continuation of railroad service in Northwestern California. By 1997, the railroad was running only three to four trains per week. In 1997, severe winter storms caused substantial rock slides and erosion, damaging much of the NCRA’s tracks and infrastructure. This included tunnel closures on the NCRA line at the Eel River Canyon, which cut off the north end of the line from the rest of the NCRA track system. Since 1997, the NCRA has been engaged in trying to obtain federal and state funds to reopen the line. Though the tracks have not been in use for over 13 years, the NCRA maintains the stance that rail service will be restored in portions of the project area.

In May of 2009, in anticipation of the proposed project, the NCRA released Policy 0907 – “Trail Projects on the Nationwide Permit (NWP) Line Rights-of-Way: Design, Construction, Safety, Operations, and Maintenance Guidelines.” This document outlines the NCRA’s policies on “Rail-with-Trail” projects and provides uniform and consistent standards on NCRA’s rights-of-way for the design, construction, safety, operations, and maintenance of Rail-with-Trail Projects.

The results of this Corridor Study can be utilized to minimize potential construction schedule delays and change orders by facilitating the necessary planning and coordinating with regulatory agencies, disposal facilities, and/or responsible parties prior to construction. The scope of work did not include soil and groundwater sampling or analysis in the area of the Project.

The Corridor Study included reviewing government records for sites along segments of the Project alignment alternatives and within 500 feet that may have potential for environmental concern during construction. The basis for the records review was a government database search that was conducted by Environmental Data Resources Inc. (EDR) with attached reports and study area maps. The EDR Reports identified sites that government regulatory agencies have reported as having had environmental concerns, such as releases of contaminants to the soil and/or groundwater or underground storage tanks (USTs) or use of hazardous materials. Winzler & Kelly further researched listed sites that appear likely to affect the Project by reviewing available records on the State Water Resources Control Board GeoTracker Website.

During the course of this Corridor Study, Winzler & Kelly completed a site walk of the entire corridor and made observations of the entire Project alignment to look for potential sites of concern which were not listed in the EDR Report. Alignment reconnaissance was also performed to verify the locations of listed sites. Aerial photos spanning from the years 1941 to 1996 were reviewed at the Humboldt County Department of Public Works Division of Natural Resources. Winzler & Kelly also interviewed Sherman Hannon, a former employee of several railroad companies in the Humboldt Bay area.

2.0 POTENTIAL CONSTRUCTION IMPACTS

This Corridor Study discovered evidence that soil and groundwater impacts from historical activities and/or leaking petroleum USTs has the highest potential at 15 locations (see Figures and Tables 1 and 2 for locations and constituents of concern) within, or adjacent to, the Project alternatives, as follows: (Hazard Rank definitions are discussed in Section 4.5)

Site	Hazard Rank	Phase I Map ID	Figure
Reliable Equipment Company	1	1	3-07
Arcata High School/ Six Rivers Charter High School/ North Humboldt Union High School/ Pacific Coast High School	2	2	3-05
Beatrice Fish/Beatrice Fisch Trust/Fisch Trust Property	2	3	3-06
M Street Property	2	4	3-05
Humboldt Waste Management Authority	2	5	3-09
Little Lake Industries	2	6	3-10
Hitt Family Bypass Trust	2	7	3-06
Teepee Burner TB-A	2	TB-A	3-01
Teepee Burner TB-B	1	TB-B	3-03
Teepee Burner TB-C	2	TB-C	3-04
Teepee Burner TB-D	2	TB-D	3-04
Teepee Burner TB-E	2	TB-E	3-10
Teepee Burner TB-F	2	TB-F	3-14
Teepee Burner TB-G	2	TB-G	3-36, 3-27
Teepee Burner TB-H	2	TB-H	3-28

The recommended Project alignment is adjacent to, and parallel to, the railroad right-of-way (Figure 2) for the majority of the proposed alignments. Winzler & Kelly has found that other railroad sites we have investigated in the past have contained heavy metals, hydrocarbons, chlorinated compounds, pesticides, and PCBs in soil and groundwater. Eight former teepee burner locations are also adjacent to the railroad, which have the potential to impact the Project alignment and/or construction, and which could pose a health exposure risk to construction workers.

3.0 GROUNDWATER ELEVATION AND FLOW DIRECTION

Depth-to-groundwater in the Project area is generally very shallow, ranging from a minimum of approximately at the ground surface in the southern Project portion, to a maximum of approximately 20 feet bgs in the northern Project portion of the alignment. Variability in groundwater depth occurs on a seasonal basis, and is dependent on the amount of precipitation received during the rainy season. Groundwater in the Project vicinity has been reported to flow towards the Arcata Bay (generally south to southwest), which is expected based on local topography. It is anticipated that groundwater will be encountered during execution of the Project.

4.0 SOIL AND GROUNDWATER IMPACTS

4.1 SOIL IMPACTS

Residual soil impacts on portions of the project area are possible, as detailed below in section 4.4. Field screening will be required to identify areas of contamination and analytical services would be necessary to quantify the contaminants. Impacted soil will require special handling, including segregated stockpiling and manifested disposal.

4.2 GROUNDWATER IMPACTS

Groundwater is expected to be encountered during construction activities and the extent of the groundwater encountered will depend on the time of year the construction takes place. Construction will require grading, excavating, fill, and constructing retaining walls, and sheet piling. Groundwater pumped from potential excavations could contain residual contaminants. Field screening will be required and analytical services would be necessary to quantify the contaminants. Contaminated groundwater may require treatment prior to disposal.

4.3 DISCUSSION OF IMPACTS

A number of potentially impacted sites were identified in the EDR Report and are listed in Tables 1 and 2. Additionally, eight former teepee burner locations were identified from aerial photo review. File reviews were conducted for those sites that were considered to have potential impact to the Project. In addition, visual observations were made of the Project alignment for gasoline service stations or other potentially impacted sites that were not listed in the EDR Report.

Gasoline service stations are considered potentially impacted whether or not they are associated with known leaking USTs, since gasoline stations are typically associated with petroleum hydrocarbons, benzene, toluene, ethyl-benzene, xylene (BTEX) and methyl tert-butyl ether (MTBE) releases to the environment.

Based on the data available, each of the potentially impacted sites that could affect the Project has been assigned a Hazard Rank which is defined as follows:

- Hazard Rank 1:** A site that will likely affect Project construction. Contamination of soil and/or groundwater is confirmed to be within the Project alignment.
- Hazard Rank 2:** A site with the potential to affect the Project, either because of the presence of contamination that may likely migrate into the Project area or because the extent of contamination is unknown.
- Hazard Rank 3:** A site that is not known to be contaminated, but due to current or historical use could possibly have contamination that could affect Project construction.
- Hazard Rank 4:** A site that has little or no potential to affect the Project.

Sites assigned a hazard rank of 1 or 2 are discussed below, with the EDR sites (hazard rank 1 through 4) presented in Table 1, and the historical teepee burners presented in Table 2. The 42 sites identified in the EDR report within the study area are shown on the figures, although only 7 of them are considered sites of potential concern.

4.4 REGULATORY DATABASE REVIEW

The high ranking sites were searched/reviewed on the State Water Resource Control Board's website GeoTracker database for depth to groundwater, historical site impacts, and a summary of regulatory history. The following is a list of high-ranking identified sites along the Project alignment with a summary of contaminants, groundwater elevation data (if available), and their assigned Hazard Rank based on the above criteria. Sites are listed in ranking order. The "EDR ID number" associated with each site corresponds to the EDR Maps, presented in Appendix A. Some EDR ID numbers have multiple sites associated with them due to the sites being located near each other. Some sites also have multiple EDR ID numbers, due to their being listed in the various databases searched. Additionally, several sites identified by EDR are incorrectly plotted on the EDR Map, and are actually outside the project area. The EDR report identified numerous additional sites along the Project alignment, which are not discussed in this report because the additional sites were ranked too low to be of concern. However, each of the sites ranked 1 through 4 are presented on Figures 3-01 through 3-28 and Tables 1 and 2.

4.5 Hazard Ranking

Hazard Rank 1

- Map ID #1 – Reliable Equipment Company, located at 1217 & 1219 11th Street, on the south side of 11th Street on the western side of the railroad right-of-way (EDR ID 10). This site has documented groundwater impacts (gasoline, BTEX, MTBE). The groundwater plume may extend beneath 11th Street, the railroad, and the proposed trail, and would be expected to impact the Project if excavation was performed to a depth sufficient to encounter groundwater.

- Map ID #TB-B – Former Twin Parks Lumber Mill, located between Shay Park and Sunset Avenue approximately 300 feet south of the Wilson Street and Sunset Avenue intersection. This site location has documented soil impact (dioxins and furans) from a former teepee burner. The impacts to soil may extend beneath the railroad, and the proposed trail, and would be expected to impact the Project if soil disturbance is performed.

Hazard Rank 2

- Map ID #2 – Arcata High School/ Six Rivers Charter High School/ North Humboldt Union High School/ Pacific Coast High School located at 1720 M Street, near the northeast corner of 16th and M Streets (EDR ID 2) at least 250 feet east of the alignment. Documented soil contamination (gasoline) present at the property, unlikely to extend to the Project alignment. Depth to groundwater undetermined.
- Map ID #3 – Beatrice Fish/ Beatrice Fisch Trust/ Fisch Trust Property, located at 1461 M Street, at least 100 feet west of the alignment (EDR ID 4). Potential impact if contaminated groundwater present beneath alignment. Depth to groundwater undetermined, and direction of groundwater is uncertain but likely to the south-southwest. Given the direction of suspected groundwater flow, it is unlikely that this site will affect the project.
- Map ID #4 – M Street Property, located at 1215 M Street, located 300 feet west of the project alignment (EDR ID 6). The site is a former lumber mill with a Superfund funded Brownfield site assessment underway. Potential impact if contaminated groundwater present beneath alignment. Depth to groundwater undetermined. However, based on southwesterly flow direction, it is unlikely that impacted groundwater would flow beneath the proposed alignment and affect the Project.
- Map ID #5 – Humboldt Waste Management Authority, located at the 1220 Fifth Street (EDR ID 14), is currently under site assessment for a gasoline leak. This parcel is adjacent to the west side of the alignment and has a moderate potential to contain soil and groundwater impacts. Potential impact if contaminated groundwater present beneath alignment. Depth to groundwater is approximately 3 to 7 feet below the ground surface (bgs) based on monitoring wells from an adjacent site.
- Map ID #6 – Little Lake Industries, located at 46 South I Street. This parcel is greater than 200 feet north of the project alignment and has a low potential to contain soil and groundwater impacts. Potential impact if contaminated groundwater present beneath alignment. Depth to groundwater is expected to be very shallow due to the proximity to the Humboldt Bay and Arcata water treatment ponds located immediately to the south of the project alignment.
- Map ID #7 – Hitt Family Bypass Trust, located at 1188 13th Street, located 200 feet east of the project alignment (EDR ID 5). Leaking USTs reported (diesel), groundwater samples reportedly did contain very low levels of contamination. Due to the year of site closure and extent of historical groundwater contamination, this site has a low potential to contain soil and groundwater impacts which would affect the project alignment. Depth to groundwater is within approximately one foot of the ground surface.

- Map ID TB-A – Former Twin Parks Lumber Mill, teepee burner was located between the Arcata Skate Park and Eye Street, 25 feet northwest of the railroad right-of-way. The impact to soil may extend beneath the railroad, and the proposed trail, and has the potential to impact the Project if soil disturbance is performed adjacent to this site.
- Map ID TB-C – Former Spires Lumber Mill, teepee burner (#1) was located between Alliance Rd., M Street, and Foster Avenue approximately 250 feet south of the North Street and Foster Avenue intersection. The impact to soil may extend beneath the railroad, and the proposed trail, and has the potential to impact the Project if soil disturbance is performed adjacent to this site.
- Map ID TB-D – Former Spires Lumber Mill, teepee burner (#2) was located between Alliance Rd., M Street, and Foster Avenue approximately 500 feet south of the North Street and Foster Avenue intersection. The impact to soil may extend beneath the railroad, and the proposed trail, and has the potential to impact the Project if soil disturbance is performed adjacent to this site.
- Map ID TB-E – This former smaller teepee burner was located at the present Little Lake Industries business approximately 750 feet southeast of the railroad and Samoa Boulevard/Highway 255 intersection in Arcata and 100 east of the railroad right-of-way. The impact to soil may extend beneath the railroad, and the proposed trail, and has the potential to impact the Project if soil disturbance is performed adjacent to this site.
- Map ID TB-F – This former teepee burner was located in the current Arcata Marsh area approximately 1,000 feet southeast of the South I Street and railroad intersection, and 50 feet east of the railroad right-of-way. The impact to soil may extend beneath the railroad, and the proposed trail, and has the potential to impact the Project if soil disturbance is performed adjacent to this site.
- Map ID TB-G – This former teepee burner was located in the northeast corner of the Bracut area on the west side of Highway 101 and approximately 100 feet west of the railroad right-of-way. The impact to soil may extend beneath the railroad, and the proposed trail, and has the potential to impact the Project if soil disturbance is performed adjacent to this site.
- Map ID TB-H – This former teepee burner was located in the western central portion of the Bracut area on the west side of Highway 101 and approximately 500 feet west of the railroad right-of-way. The impact to soil may extend beneath the railroad, and the proposed trail, and has the potential to impact the Project if soil disturbance is performed adjacent to this site.

5.0 HISTORICAL AIR PHOTO REVIEW

Historical aerial photographs were reviewed as part of the Hazardous Materials Corridor Study for the Project alignment and surrounding areas for the years 1941, 1948, 1954, 1958, 1962, 1966, 1970, 1974, 1981 and 1996 (Appendix B). The photographs are at a scale of approximately 1:12,000 and 1:24,000. The following is a summary of the findings:

- 1941: This aerial photograph indicates the existence of three lumber mill operations near the project alignment, one on the south side of the Sunset Avenue railroad crossing, one at Foster and Alliance Streets, and one on the south side of the Alliance/K Street railroad crossing. The 5th and 9th Street train loading station is apparent. The entire railroad alignment from the Arcata Marsh area to the Bracut area has US Highway 101 and pasture lands on the east side and marsh/bay on the west side.
- 1948: This aerial photograph appears similar to the previous photograph except the lumber mill operations have expanded; additional lumber mills are visible, including one located adjacent to the southwest side of the Samoa Boulevard railroad crossing, and two mills at the old dock crossroads (end of South I Street) in the central Arcata Marsh area.
- 1954: This aerial photograph appears similar to the previous photograph except the lumber mill operations have again expanded. A new lumber mill is located at the present Bracut area on the west side of US Highway 101 and the railroad. Additionally, at least six new teepee burners have been constructed at the lumber mills: one teepee burner (See Map ID TB-A, Figure 3-01) is located adjacent to the west side of the railroad approximately 300 feet northeast of the present skate park at Sunset Avenue; two teepee burners (See Map IDs TB-B and TB-C, and Figures 3-03, 3-04) are adjacent to the railroad with one to the north of Arcata High and one to the south of Sunset and Foster Avenues; two teepee burners (See Map IDs TB-E and TB-F, Figures 3-10, 3-24) are located on the east and south sides of the railroad in the Arcata Marsh old cross roads area (South I Street); and, one teepee burner (See Map ID TB-G, Figure 3-27) is located at the north end of the Bracut area on the west side of the railroad. The surrounding pasture lands of the south and southeast areas appear similar to the previous photographs.
- 1958: This aerial photograph appears similar to the previous photograph except the previously visible lumber mill operations have further expanded in the Arcata Marsh and Bracut areas. One additional teepee burner (See Map ID TB-H, Figure 3-28) has been constructed in the middle of the western Bracut area.
- 1962: This aerial photograph appears similar to the previous photograph except the southernmost Arcata wastewater treatment pond has been constructed with associated infrastructure located adjacent to the west side of the railroad.
- 1966: This aerial photograph appears similar to the previous photograph except another Arcata wastewater treatment pond has been constructed northwest of the existing pond, and a teepee burner has been constructed on the east side of the railroad to the northeast of the new Arcata Marsh pond.

- 1970: This aerial photograph appears similar to the previous photograph except none of the teepee burners near the railroad appear to be active.
- 1974: This aerial photograph appears similar to the previous photograph except the eight teepee burners near the railroad appear to have been removed.
- 1981: This aerial photograph appears similar to the previous photograph except three Arcata Marsh ponds are being constructed to the north and east of the existing ponds, and the lumber mills between Arcata High School and Sunset Avenue are no longer visible.
- 1996: This aerial photograph appears similar to the previous photograph except three Arcata wastewater treatment ponds are being constructed.

6.0 INTERVIEW

Former railroad employee Sherman Hannon was interviewed regarding past uses and observations of the Project alignment. Mr. Hannon worked for the Northwestern Pacific Railroad Company Traffic Department from 1969 to 1979. Then Mr. Hannon worked for the Arcata Mad River Railroad Company from 1979 to 1983. Finally Mr. Hannon worked as Operating Manager for the Eureka Southern Railroad Company from 1982 to 1983. Mr. Hannon said he was not aware of any spills or hazardous materials releases along the Project alignment and that train cars and engines were serviced and maintained in Eureka. He mentioned that the Arcata train depot was located at the current Arcata car wash on K and 10th Streets, there were no roundabouts present within the Project boundaries. Additionally, Mr. Hannon stated that one railroad spur was located near the old Arcata Recycling Center at 1380 9th Street, and that a very small quantity of treated wood was transported via rail from Arcata during the late 1970's and early 1980's.

7.0 CONCLUSIONS

Impacted soil and groundwater is anticipated to be encountered within the Project if soil disturbance occurs immediately adjacent to the sites with a hazard ranking of one or two. The 15 sites discussed within this report that have a hazard ranking of one or two are detailed in the attached tables and figures. It is assumed that soil disturbance is planned for the entire length of the trail alignment, as either excavation or scarifying prior to compaction and placement of fill are anticipated to occur.

Based on the shallow depth to groundwater throughout the alignment vicinity, and depending on the time of year construction occurs (e.g. winter vs. summer), groundwater will likely be encountered within the selected alignment if excavations are to occur.

Construction workers have the potential to be exposed to hazardous contaminants when construction activities occur in the immediate vicinity of the 15 sites with a hazard rank of 1 or 2. Earthmoving activities, including scarifying or driving on dry exposed soil, may expose workers to dust containing contaminants, especially in the areas near the former teepee burners. Soil removed from these areas

may have to be tested and disposed of out of the area. Groundwater pumped from excavations in these areas may also have to be tested and treated, prior to disposal.

8.0 RECOMMENDATIONS

Pre-construction soil borings are recommended in order to characterize the soil and groundwater in 15 locations. Laboratory analytical results of samples collected from the borings will be utilized to ascertain whether health and safety concerns are present for construction workers, and to determine soil and/or groundwater handling and disposal options. Soil borings and/or grab groundwater samples and additional recommendations are detailed for the following locations:

- Adjacent to the railroad right-of-way where the alignment follows the railroad. Although contamination is not documented in these areas, based on Winzler & Kelly's experience with other railroad properties, it is expected that the railroad right-of-way along the recommended alignment may contain soil and/or groundwater contamination. Access to railroad property can take numerous months to arrange, and should be started well in advance of the proposed sampling activities.
- Adjacent to Reliable Equipment Company (Hazard Rank 1) on the corner of 11th and L Streets. Residual groundwater contamination has a high probability of being present.
- At least eight former teepee burners were identified adjacent to the Project alignment. Based on a Winzler & Kelly Phase II investigation of one teepee burner at map location B (Hazard Rank 1), concentrations of dioxins and furans were reported in samples collected from that location and present an immediate hazard to construction workers if soil is disturbed in the vicinity of former teepee burner.
- Until soil is sampled and delineated at the other seven identified former teepee burner (Hazard Rank 2) locations (Map IDs TB-A and TB-C through TB-H) adjacent to the Project alignment, it is possible that varying concentrations of dioxins and furans, and heavy metals are present. Therefore, Winzler & Kelly recommends soil sampling for dioxins and furans, and heavy metals prior to disturbance of soil (grading, excavating, scarifying etc.) during trail construction.

9.0 SPECIAL TERMS AND CONDITIONS

Professional judgment was exercised in gathering the information obtained, and Winzler & Kelly is committed to the usual care, thoroughness, and competence being practiced in the engineering profession at the time this work was performed. No investigative method can completely eliminate the possibility of obtaining partially imprecise or incomplete information. Conclusions were based on the best information available during the period of the investigation and within the scope of services prescribed in our Agreement. Thus, Winzler & Kelly cannot guarantee that the investigation completely defines the potential for any contamination by hazardous or otherwise harmful substances described in this report or, if no such contamination is found, its absolute absence.

Table 1.
Summary of Phase I Map ID/ EDR Sites
 City of Arcata, Rails-with-Trails Project

Phase I Map ID/ EDR Map ID ¹	Site Name	Site Address	Contaminants of Concern	Details of Contamination, Media, Extent, Concentrations, etc.	Groundwater Depth/ Direction	Hazard Rank	Figure
1/ 10	Reliable Equipment Company	1217 & 1219 11 th Street	gasoline, BTEX, and MTBE	LUST-case closed 2007, Soil and groundwater impacted with gasoline. Gasoline and BTEX in groundwater up to 110,000 and 15,000 ppb, respectively. Residual MTBE at 28 ppb reported at the time of case closure. Impact probability is high if contaminated groundwater still present beneath the site.	2.33 to 7.96 feet bgs in a southerly direction	1	3-07
2/ 2	Arcata High School/Six Rivers Charter High School/North Humboldt Union High School/Pacific Coast High School	1720 M Street	diesel	LUST-case closed 1994, small quantity generator of hazardous waste	unknown-approximately to the south from topography	2	3-05
3/ 4	Beatrice Fish/Beatrice Fisch Trust/Fisch Trust Property	1461 M Street	gasoline	LUST-case closed 2004	unknown-approximately to the south from topography	2	3-06
4/ 6	M Street Property	1215 M Street	VOCs and potentially dioxins/furans	Lumber Mill until the late 1960's, current USEPA Brownfields site assessment underway.	unknown-approximately to the south from topography	2	3-05
5/ 14	Humboldt Waste Management Authority	1220 Fifth Street	gasoline	LUST-gasoline leak assessment in progress. Impact probability is moderate.	unknown-approximately to the south from topography	2	3-09
6/ 16	Little Lake Industries	46 South I Street (Could not field verify actual location)	petroleum hydrocarbons, and heavy metals	LUST-diesel case closed 2000. Separate 2004 case open for site assessment. Fuel leak assessment in progress for waste oil, hydraulic oil, motor oil, and other petroleum hydrocarbons. Impact probability is low.	unknown-approximately to the south from topography	2	3-10
7/ 5	Hiitt Family Bypass Trust	1188 13th Street	diesel	LUST-case closed 2003. Groundwater impacted by diesel up to 950 ppb in 2001.	0.0 to 1.13 feet bgs	2	3-06
8/ 3	Sholes Overhead Door Company	1485 L Street	potentially gasoline and diesel	USTs reported on site	unknown-approximately to the south from topography	3	3-06
9/ 4	Reid & Wright Lumber Mill	14th & M Street	petroleum products	LUST-case closed 1998	unknown-approximately to the south from topography	3	3-06
10/ 4	Bug Press	1461 M Street	hazardous waste from printing products	small quantity generator	unknown-approximately to the south from topography	4	3-06

Table 1.
Summary of Phase I Map ID/ EDR Sites
City of Arcata, Rails-with-Trails Project

Phase I Map ID/ EDR Map ID¹	Site Name	Site Address	Contaminants of Concern	Details of Contamination, Media, Extent, Concentrations, etc.	Groundwater Depth/ Direction	Hazard Rank	Figure
11/ 5	Chris Richards Automotive	1188 13th Street	petroleum products	small quantity generator	unknown-approximately to the south from topography	4	3-06
12/ 5	Marv's Electric-Arcata Marine	1198 West 13th Street/ 1188 13th Street	diesel	LUST-case closed 2003.	unknown-approximately to the south from topography	3	3-06
13/ 5	Arcata Marine	1198 13th Street	petroleum products	small quantity generator	unknown-approximately to the south from topography	4	3-06
14/ 7	Rick's Body Shop	1235 K Street	petroleum products	small quantity generator	unknown-approximately to the south from topography	4	3-07
15/ 8	Reliable Hardware	1309 11th/ M Street	gasoline	LUST-case closed 1994.	unknown-approximately to the south from topography	3	3-07
16/ 9	German Motors	1065 K Street	gasoline	LUST-case closed 1995.	unknown-approximately to the south from topography	3	3-07
17/ 9	Wallace and Heinz	1065 K Street	gasoline	LUST-case closed 1995.	unknown-approximately to the south from topography	3	3-07
18/ 9	Cahill Shell	1122 K Street	gasoline	active case for UST	unknown-approximately to the south from topography	3	3-07
19/ 10	Ag Sales	1219 11th Street	petroleum products	hazardous waste	unknown-approximately to the south from topography	4	3-07
20/ 11	Humboldt County Division of Environmental Health/ Arcata Community Recycling Center	1380 9th Street	gasoline, petroleum products, household hazardous waste	active case for UST	unknown-approximately to the south from topography	3	3-08
21/ 12	None	1080 8th Street	creosote	1997 spill inside residence	unknown-approximately to the south from topography	4	3-08
22/ 12	Arcata Transmission	801 K Street	petroleum products	none	unknown-approximately to the south from topography	4	3-08
23/ 12	California Central Creamery Building	L/ 8th Street	diesel	LUST-case closed 2003	unknown-approximately to the south from topography	3	3-08
24/ 12	Arcata Moving Storage/ Arcata Bekin Moving & Storage	1191 9th Street	gasoline	LUST-case closed 2002	unknown-approximately to the south from topography	3	3-08
25/ 13	Yakima Products	1385 8th Street	petroleum products	small quantity generator	unknown-approximately to the south from topography	4	3-08
26/ 14	F & E Investments	1162 Samoa Boulevard	diesel	UST present	unknown-approximately to the south from topography	4	3-09
27/ 14	Trombetta Warehouse	1162 Samoa Boulevard	petroleum products, oil	LUST-case closed 1999	unknown-approximately to the south from topography	3	3-09
28/ 14	Whiteley Arcata Diesel Cardlock	1092 5th Street	diesel	LUST-case closed 1998, additional USTs present	unknown-approximately to the south from topography	3	3-09
29/ 14	Beaver Lumber Company/ Foxfarms Soil & Fertilizer	1220 5th Street	gasoline	LUST-case closed 2007	unknown-approximately to the south from topography	3	3-09
30/ 14	None	626 K Street	petroleum products	hazardous materials spill reported 1999	unknown-approximately to the south from topography	4	3-08

Table 1.

City of Arcata, Rails-with-Trails Project

Phase I Map ID/ EDR Map ID ¹	Site Name	Site Address	Contaminants of Concern	Details of Contamination, Media, Extent, Concentrations, etc.	Groundwater Depth/ Direction	Hazard Rank	Figure
31/ 14	Lorenzo Service Center	660 K Street	None	UST present	unknown-approximately to the south from topography	4	3-08
32/ 15	C & K Johnson Industries	1061 Samoa Boulevard	None	Storm water permit, transfer station	unknown-approximately to the south from topography	4	3-09
33/ 16	Richard Winkel/ Harris Pine Mills	46 South I Street	diesel	LUST-case closed 2000, additional UST present, small quantity generator	unknown-approximately to the south from topography	3	3-10
34/ 17	Gene's Machine Works	320 South G Street	None	UST present	unknown-approximately to the south from topography	4	3-10
35/ 18	Arcata Landfill/ Arcata Marsh	End of South I Street	Landfill contaminants	Former landfill	unknown-approximately to the south from topography	4	3-13
36/ 19	Western Pacific Specialties	520 South G Street	petroleum products	small quantity generator	unknown-approximately to the south from topography	4	3-15
37/ 20	City of Arcata Wastewater Treatment Facility	601 South G Street	sewage, petroleum products	Historical sewage discharge violations, small quantity generator	unknown-approximately to the south from topography	4	3-15
38/ 20	City of Arcata Compost Facility/ Sewage Treatment Plant/ Corporation Yard	600 South G Street	metals, petroleum products	Compost byproducts, mercury disposal, storm water permit, AST, small asphalt emulsion spill 2001	unknown-approximately to the south from topography	4	3-15
39/ 21	Fabcast	600 South G Street	None	Historical UST, recycled solvents	unknown-approximately to the south from topography	4	3-15
40/ 22	Travel Master	960 South G Street	asbestos	Historical disposed of asbestos	unknown-approximately to the south from topography	4	3-17
41/ 1 ²	Cash-n-Carry	6700 US Highway 101, North	diesel	Diesel spill with impacts to soil	unknown-approximately to the west from topography	4	3-28
42/ 2 ³	Snyder Residence	2533 Eye Street	diesel	Diesel spill with impacts to soil	unknown-approximately to the south from topography	4	3-01

Notes:

BTEX = benzene, toluene, ethylbenzene, and xylenes.

Methyl tert butyl ethylene = MTBE

ppb = parts per billion

bgs = below the ground surface

LUST = leaking underground storage tank

VOCs = volatile organic compounds

UST = underground storage tank

AST = above ground storage tank

EDR Map ID¹ = report with inquiry # 02649128.1r-December 4, 2009

EDR Map ID² = report with inquiry # 02746653.1r-April 15, 2010

EDR Map ID³ = report with inquiry # 02740396.1r-April 15, 2010

Hazard Rank:

- 1) A site that will affect Project construction. Contamination of soil and/or groundwater is confirmed to be within the Project alignment.
- 2) A site with the potential to affect the Project, either because of the presence of contamination that may likely migrate into the Project area or because the extent of contamination is unknown.
- 3) A site that is not known to be contaminated, but due to current or historical use could possibly have contamination that could affect Project construction.
- 4) A site that has little or no potential to affect the Project.

Table 2.
Summary of Phase I Former Teepee Burner Sites
City of Arcata, Rails-with-Trails Project

Phase I Map ID	Site Location	Contaminants of Concern	Groundwater Depth/ Direction	Hazard Rank	Figure
TB-A	Between the Arcata Skate Park and Eye Street, 25 feet north of the railroad right-of-way.	Heavy metals and dioxins/furans	unknown-approximately to the south from topography	2	3-01
TB-B	Between Larson Park and Sunset Avenue approximately 300 feet south of the Wilson Street and Sunset Avenue intersection	Heavy metals and dioxins/furans	unknown-approximately to the south from topography	1	3-03
TB-C	Between Alliance Rd., M Street, and Foster Avenue approximately 250 feet south of the North Street and Foster Avenue intersection	Heavy metals and dioxins/furans	unknown-approximately to the south from topography	2	3-04
TB-D	Between Alliance Rd., M Street, and Foster Avenue approximately 500 feet south of the North Street and Foster Avenue intersection	Heavy metals and dioxins/furans	unknown-approximately to the south from topography	2	3-04
TB-E	Little Lake Industries approximately 750 feet southeast of the railroad and Samoa Boulevard/Highway 255 intersection in Arcata and 100 feet east of the railroad right-of-way.	Heavy metals and dioxins/furans	unknown-approximately to the south from topography	2	3-10
TB-F	Arcata Marsh approximately 1000 feet southeast of the South I Street and railraod intersection, and 50 feet east of the railroad right-of-way.	Heavy metals and dioxins/furans	unknown-approximately to the south from topography	2	3-14
TB-G	The northeast corner of the Bracut area on the west side of Highway 101 and approximately 100 feet wesrt of the railroad right-of-way.	Heavy metals and dioxins/furans	unknown-approximately to the south from topography	2	3-26, 3-27
TB-H	The western central portion of the Bracut area on the west side of Highway 101 and and approximately 500 feet west of the railroad right-of-way.	Heavy metals and dioxins/furans	unknown-approximately to the south from topography	2	3-28

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STATE AND LOCAL RECORDS

SLIC: SLIC Region comes from the California Regional Water Quality Control Board.

A review of the SLIC list, as provided by EDR, and dated 03/22/2010 has revealed that there is 1 SLIC site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/31/2010	Source: EPA
Date Data Arrived at EDR: 04/02/2010	Telephone: N/A
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 04/02/2010
Number of Days to Update: 10	Next Scheduled EDR Contact: 07/26/2010
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2010	Source: EPA
Date Data Arrived at EDR: 04/02/2010	Telephone: N/A
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 04/02/2010
Number of Days to Update: 10	Next Scheduled EDR Contact: 07/26/2010
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2010	Source: EPA
Date Data Arrived at EDR: 04/02/2010	Telephone: N/A
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 04/02/2010

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 03/01/2010
Number of Days to Update: 56	Next Scheduled EDR Contact: 05/31/2010
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/29/2010	Source: EPA
Date Data Arrived at EDR: 02/09/2010	Telephone: 703-412-9810
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 03/30/2010
Number of Days to Update: 62	Next Scheduled EDR Contact: 07/12/2010
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/23/2009	Source: EPA
Date Data Arrived at EDR: 09/02/2009	Telephone: 703-412-9810

Number of Days to Update: 19	Next Scheduled EDR Contact: 06/14/2010
	Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 01/13/2010
Date Data Arrived at EDR: 01/15/2010
Date Made Active in Reports: 02/18/2010

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/19/2009	Source: EPA
Date Data Arrived at EDR: 10/22/2009	Telephone: (415) 947-8000
Date Made Active in Reports: 12/01/2009	Last EDR Contact: 03/15/2010
Number of Days to Update: 40	Next Scheduled EDR Contact: 06/28/2010
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/01/2007	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 11/19/2008	Telephone: 202-307-1000

Next Scheduled EDR Contact: 07/12/2010
Data Release Frequency: No Update Planned

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 03/15/2010

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

DETAILED ORPHAN LISTING

Site	Database(s)	EDR ID Number EPA ID Number
------	-------------	--------------------------------

ARCATA REDWOOD CO. BRAINARD (Continued)		S106101352
---	--	------------

Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.

Secondary Waste: Not reported

Secondary Waste Type: Not reported

Design Flow: 0

Baseline Flow: 0

Reclamation: No reclamation requirements associated with this facility.

POTW: The facility is not a POTW.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D039
 Waste name: TETRACHLOROETHYLENE

Violation Status: No violations found

**SIERRA PACIFIC IND. ARCATA DIV
2293 SAMOA RS
ARCATA, CA 95521**

**CA WDS S106100531
N/A**

CA WDS:

Facility ID: 1 12I000440
 Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
 NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
 Subregion: 1
 Facility Telephone: Not reported
 Facility Contact: GORDON AMOS
 Agency Name: SIERRA PACIFIC INDUSTRIES
 Agency Address: P.O. BOX 1189
 Agency City,St,Zip: ARCATA 95521
 Agency Contact: GORDIE AMOS
 Agency Telephone: Not reported
 Agency Type: Private
 SIC Code: 2421
 SIC Code 2: Not reported
 Primary Waste: Stormwater Runoff
 Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/31/2010	Source: EPA
Date Data Arrived at EDR: 04/02/2010	Telephone: N/A
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 04/02/2010
Number of Days to Update: 10	Next Scheduled EDR Contact: 07/26/2010
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2010	Source: EPA
Date Data Arrived at EDR: 04/02/2010	Telephone: N/A
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 04/02/2010
Number of Days to Update: 10	Next Scheduled EDR Contact: 07/26/2010
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2010	Source: EPA

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 03/01/2010
Number of Days to Update: 56	Next Scheduled EDR Contact: 05/31/2010
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/29/2010	Source: EPA
Date Data Arrived at EDR: 02/09/2010	Telephone: 703-412-9810
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 03/30/2010
Number of Days to Update: 62	Next Scheduled EDR Contact: 07/12/2010
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/23/2009	Source: EPA
Date Data Arrived at EDR: 09/02/2009	Telephone: 703-412-9810

Number of Days to Update: 19	Next Scheduled EDR Contact: 06/14/2010
	Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/05/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/11/2010	Telephone: 202-564-6023

	Data Release Frequency: Quarterly

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2007	Source: EPA/NTIS
Date Data Arrived at EDR: 02/19/2009	Telephone: 800-424-9346
Date Made Active in Reports: 05/22/2009	Last EDR Contact: 02/25/2010
Number of Days to Update: 92	Next Scheduled EDR Contact: 06/07/2010
	Data Release Frequency: Biennially

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of NPL and Base Realignment & Closure sites found in the CERCLIS database where FERRO is involved in cleanup projects.

Date of Government Version: 06/23/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/15/2010	Telephone: 703-603-8704
Date Made Active in Reports: 02/10/2010	Last EDR Contact: 04/14/2010
Number of Days to Update: 26	Next Scheduled EDR Contact: 07/26/2010
	Data Release Frequency: Varies

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 03/15/2010

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 4

EXECUTIVE SUMMARY

CDL: A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

A review of the CDL list, as provided by EDR, and dated 06/30/2009 has revealed that there is 1 CDL site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
Not reported	46 S I STREET	16	59

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, and dated 12/31/2008 has revealed that there are 28 HAZNET sites within the searched area.

EXECUTIVE SUMMARY

EMI: Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies

A review of the EMI list, as provided by EDR, and dated 12/31/2007 has revealed that there is 1 EMI site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
<i>SHELL, CAHILL</i>	<i>1122 K</i>	<i>9</i>	<i>30</i>

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/09/2009 has revealed that there is 1 ENVIROSTOR site within the searched area.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

 SIC Code: 1611
 SIC Code 2: Not reported
 Primary Waste: Contaminated Soil
 Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Description: Leak from a malfunctioning pump in the City Corporation yard caused gasoline to enter the soil. It is unknown if the leak has entered a waterway. Preliminary water samples are being taken to determine if the gasoline did enter a waterway. Possible affected waterways would be an unknown named slough and Humbolt Bay. The slough has been boomed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/01/2009	Source: EPA

Number of Days to Update: 26	Next Scheduled EDR Contact: 01/25/2010
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/17/2009
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/16/2009
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/30/2009	Source: EPA
Date Data Arrived at EDR: 08/11/2009	Telephone: 703-412-9810
Date Made Active in Reports: 09/21/2009	Last EDR Contact: 11/23/2009
Number of Days to Update: 41	Next Scheduled EDR Contact: 01/11/2010
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/23/2009	Source: EPA
Date Data Arrived at EDR: 09/02/2009	Telephone: 703-412-9810

Number of Days to Update: 19	Next Scheduled EDR Contact: 03/15/2010
	Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 08/18/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/21/2009	Telephone: 202-564-6023

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/12/2008
Date Data Arrived at EDR: 11/18/2008

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 11/12/2008
Date Data Arrived at EDR: 11/18/2008

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007	Source: Department of Environmental Protection
Date Data Arrived at EDR: 08/26/2009	Telephone: 860-424-3375

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.
